

This is Jack, he is a civil engineering major at the University of South Carolina in Columbia. He loves riding his bike to his classes and everywhere on campus. Jack is also afraid that someone might steal his bike and he is overprotective about it.

Bike Parking

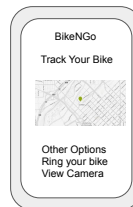

One fine evening Jack was returning from his last Friday class and comes to find out that his bike was stolen from the parking spot where he parked. He was really sad and didn't know what to do.

Jack was completely confused and lost he was insecure about his bike and that's when his friend, Matt introduced him to BikeNGo. Matt taught Jack the perks and features of the app and how it can secure his bike. Jack was really impressed and decided to get the app and device.

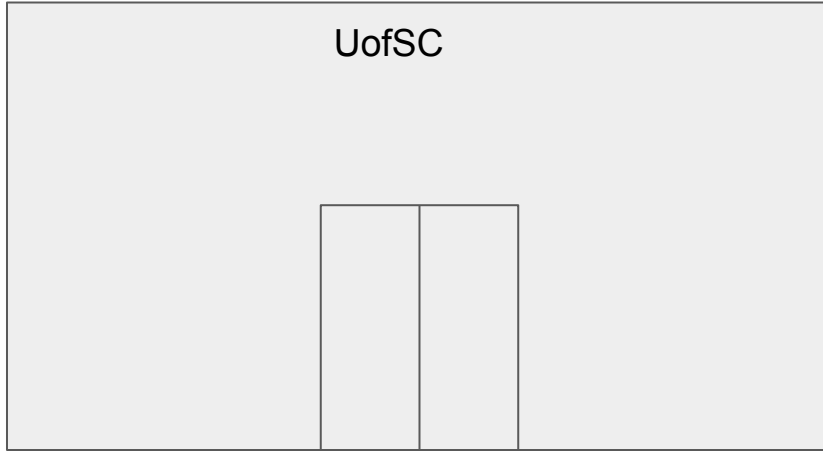

Jack immediately got the new app and the device for his new bike was ready to try out the next day when he goes to class and he was really excited about it.

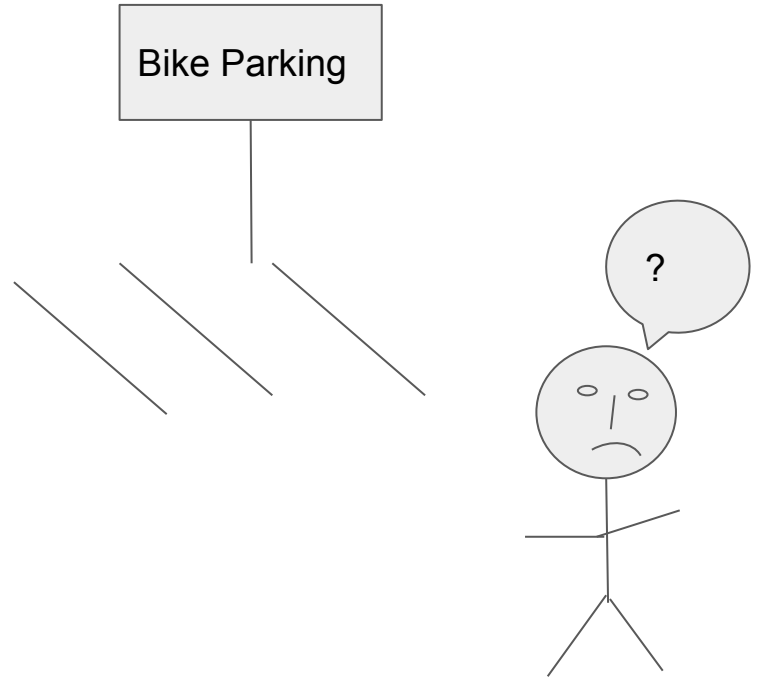

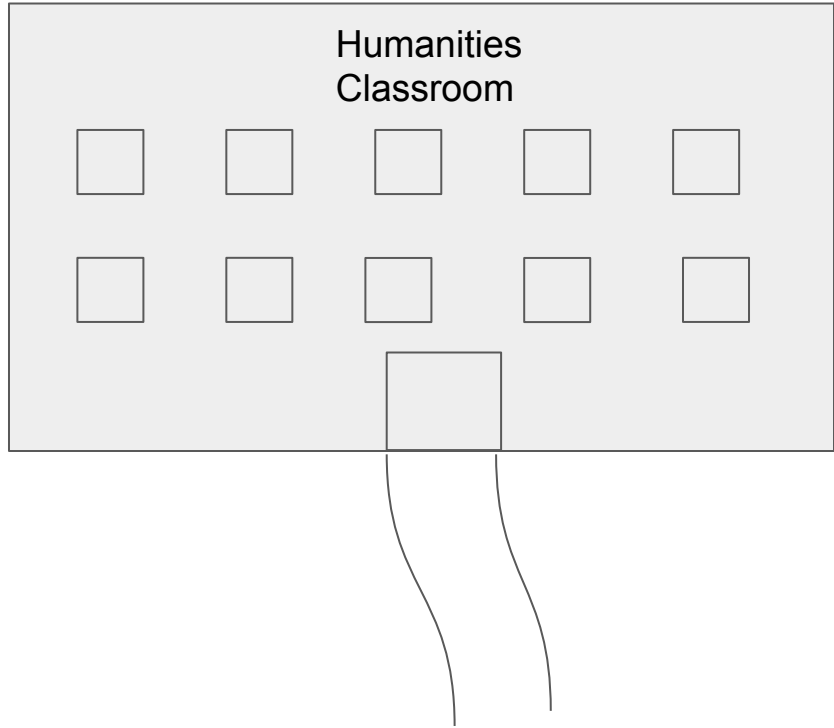

Jack was using his app to track his bike from the classroom and felt safe about parking his bike, he could also view the camera footage and use many other features.

Jack was really happy and satisfied with the app and he told all his friends about it and they also enjoyed it a lot. Now Jack doesn't have to worry about his bike getting stolen or damaged.
